

Universal Avionics InSight™ NavReference Database Alert

NOTE: You must make this information available to appropriate crew members or customers immediately!

Date: September 28, 2023

Subject: Airports removed from InSight™ NavReference database
PN 901-00-01-00-12
Cycle 2310

To: InSight™ Operators

To mitigate InSight™ memory limitations, Universal Avionics removed approximately 300 soft-surface airports from the NavReference database (PN 901-00-01-00-12) in Cycle 2310, effective 5 October 2023. The excluded airports were chosen for removal because the runway length is unpublished and unknown.

The long-term resolution to mitigate the InSight™ memory limitations will be accomplished with updates to the NavReference database coverages. The new coverages, effective Cycle 2311, will be announced in the coming days.
