

## Navigation Database Information Letter 25-04

Doc. No.: Navigation Database Information Letter 25-04

Date: April 2, 2025

### **InSight™ Database Announcement: Introduction of Email Distribution**

#### **Description**

Beginning April 3, 2025, Universal Avionics (UA) will be distributing InSight database alerts and release notices.

The notices will include:

Database alerts for data errors or issues. Database alerts could include:

- Jeppesen NavData alerts
- Universal-originated database error notice, alert notice, or general database communication Navigation Database Information Letter (NIL).

Database release notices:

- The release notice will be sent for each AIRAC cycle database distribution. The release email includes the required release statement information, including UA's Letter of Authorization (LOA) status, any deviations to the agreed data quality requirements, and any data alteration made during processing.

If you are receiving this NIL, you are a user who will receive InSight database alerts and release notices.

The database alerts and database release emails have separate opt-outs. To confirm your current options, either check your settings in UniNet under Account Info > Settings or contact [dbsales@universalavionics.com](mailto:dbsales@universalavionics.com).

To include other users in your organization on these distributions, new users may either register via [UniNet - Welcome](#) or by contacting [dbsales@universalavionics.com](mailto:dbsales@universalavionics.com).

Per RTCA DO-200A, the end user should verify that the database is current, valid, and appropriate for the intended operation. The end user should also become familiar with applicable Notices to Airmen (NOTAMs), Jeppesen Data Alerts, and Universal Avionics Data notices and alerts that may affect operation. The end user should notify UA if it discovers an error or inconsistency in the data.

UA acknowledges the absence of prior data error alerts. Starting April 3, 2025, these release notices will be distributed to meet FAA AC 20-153B compliance requirements in support of InSight embedded Terrain Awareness Warning System (TAWS).
