SERVICE BULLETIN

Service Bulletin Number 10751-34-3636

Release of Universal Flight Planning Program SCN 25.8

A. Effectivity

This Service Bulletin applies to Flight Management System (FMS) software SCNs 601.X/701.X and later, 801.X/901.X and later, and 100X.X/110X.X. Universal Flight Planning program (UFP) 25.8 supports GPS-1000 SCN 10.X, GPS-1000A SCN 20.X, GNSS-2400 SCN 10.X, GNSS-2400 SCN 11.X, GNSS-2400 SCN 30.X, SBAS ARINC SCN 10.X.

B. Compliance

UFP SCN 25.8 is optional but recommended.

NOTE: A Microsoft Windows® operating system is required for UFP SCN 25.8 which has been tested successfully on Windows XP, Windows Vista, Windows 7, and Windows 8 to ensure compatibility.

C. Description

The following enhancements were completed in UFP SCN 25.8 as it was developed from UFP SCN 25.7:

- Correctly displays only the affected airways during a pilot/company data update when a leg of the airway is deleted.

- Prevents unused legs of an airway from being displayed.

- Fixed a bug which sometimes caused airway legs to display in the wrong order.

- Corrected software to prevent the application from unexpectedly closing while deleting waypoints/airways in an erroneous route on a pilot or company data update.

D. Approval

Complies with RTCA/DO-178B (Level D), FAA Order 8110.49, and AC 20-138D
(Airworthiness Approval of Positioning and Navigation Systems)

E. Cost and Availability

The UFP program SCN 25.8 is available for free download
at www.uasc.com/home/support/universalflightplanning. The software is also available on
CD-ROM, part number **K12037-7**, for five-hundred dollars ($500) from:
